

Pintech USA  
SR Rack Assembly Instructions

Please review your parts list to ensure you have all of the necessary components.

1. First you will need to locate the “Front Curved” bar and leg assemblies.

2. Extend legs forward, into an “A” frame position.

3. Insert the 20 “Z” knobs and bolts into the open holes on the rack clamps (LMAC).

4. Insert the extended legs into the pipe connecting clamps attached to the front curved bar.

SR Rack Assembly Instructions

5. Locate the straight cymbal arms (CA-1) and the universal module mount (UM-1).

6. Insert them into your choice of the clamps on the on the rack.

7. The last part you will need to install into the rack will be the “L” tom arms (LR-78).

8. Insert the LR-78's into the four remaining clamps.

Studio Elite Insertion  
SR Rack Assembly Instructions

\*\*\*When setting up your Studio Elite kit, you will notice a couple of additional parts. These included parts are to improve positioning on specific components. Below you will find basic instructions on their placement.

1. Once you have completed the basic rack assembly, locate the additional LMA-1's.

2. Insert the first LMA-1 into the clamp that will allow you to move the SE102 into a comfortable Hi Hat playing position.

3. Follow up by inserting the remaining LMA-1 in to the open clamp on the Leg of the Rack.

Congratulations!  
Your SR rack is now set up and ready!
